A proficient Researcher passionate about engaging with diverse audiences and telling thought-provoking stories. I have experience working across development and production in factual television for award-winning companies such as Raw TV, and BBC Studios. I have a proven ability to source powerful archive material, gain access to compelling characters and find viable locations both in the UK and abroad. I am experienced working in high pressured, reactive and sensitive scenarios with the likes of the police, paramedics and border force.

I continue to produce, shoot and edit short experimental content many of which have been shown in galleries and film festivals across the UK. I am currently a Production Researcher at Raw TV working on series 6 of observational documentary *Heathrow: Britain's Busiest Airport*, I wish to obtain a similar researcher position on a production team to enhance my ability to be able to tell powerful and compelling narratives.
